2022

Bosio Company and Elite Aero Support merge Part-145 and Part-147 certifications, forming Elite Aero Support.

Our Vision & Mission

Our Vision

To be the leading global provider of aviation solutions, setting new standards in safety, education, and service innovation.

Our Mission

By integrating advanced technology, global partnerships, and rigorous industry standards, we strive to support airlines, engineers, and students alike, ensuring safety, precision, and seamless operation.

Global Reach and Operational Efficiency

- **Training & Maintenance Hubs:** Located in Qatar, Saudi Arabia, Morocco, Algeria, Spain, Cyprus, China, Turkey, Switzerland, and South America, providing key regional support for diverse aviation markets.
- **24/7 AOG Response:** Elite's strategically placed maintenance stations across Europe, Asia, and Africa ensure rapid Aircraft on Ground (AOG) support, minimizing downtime and maximizing operational readiness.
- **Regional Expertise:** Localized service teams bring in-depth understanding of regional regulations, cultures, and aviation industry standards, enhancing client service and compliance.

Global Reach and Operational Efficiency

Our Services

EASA Part-147 Approved Courses

These courses are facilitated across key locations in Qatar, Saudi Arabia, Morocco, Algeria, Spain, Cyprus, China, Turkey, Switzerland, and South America, ensuring high accessibility for a global client base. Tailor-made courses available upon demand.

AOG Recovery

We provide extensive maintenance support, including rapid Aircraft on Ground (AOG) recovery solutions across Europe, Asia, and Africa.

Parts Delivery

Elite Aero Support offers a complete tooling and parts delivery service with cost-effective, scalable options tailored to meet specific customer requirements. Through an efficient logistics network, we ensure timely, reliable access to quality parts.

Leasing Options

This addition allows clients to streamline their leasing and maintenance under a single, reliable provider, enhancing aircraft uptime and operational convenience.

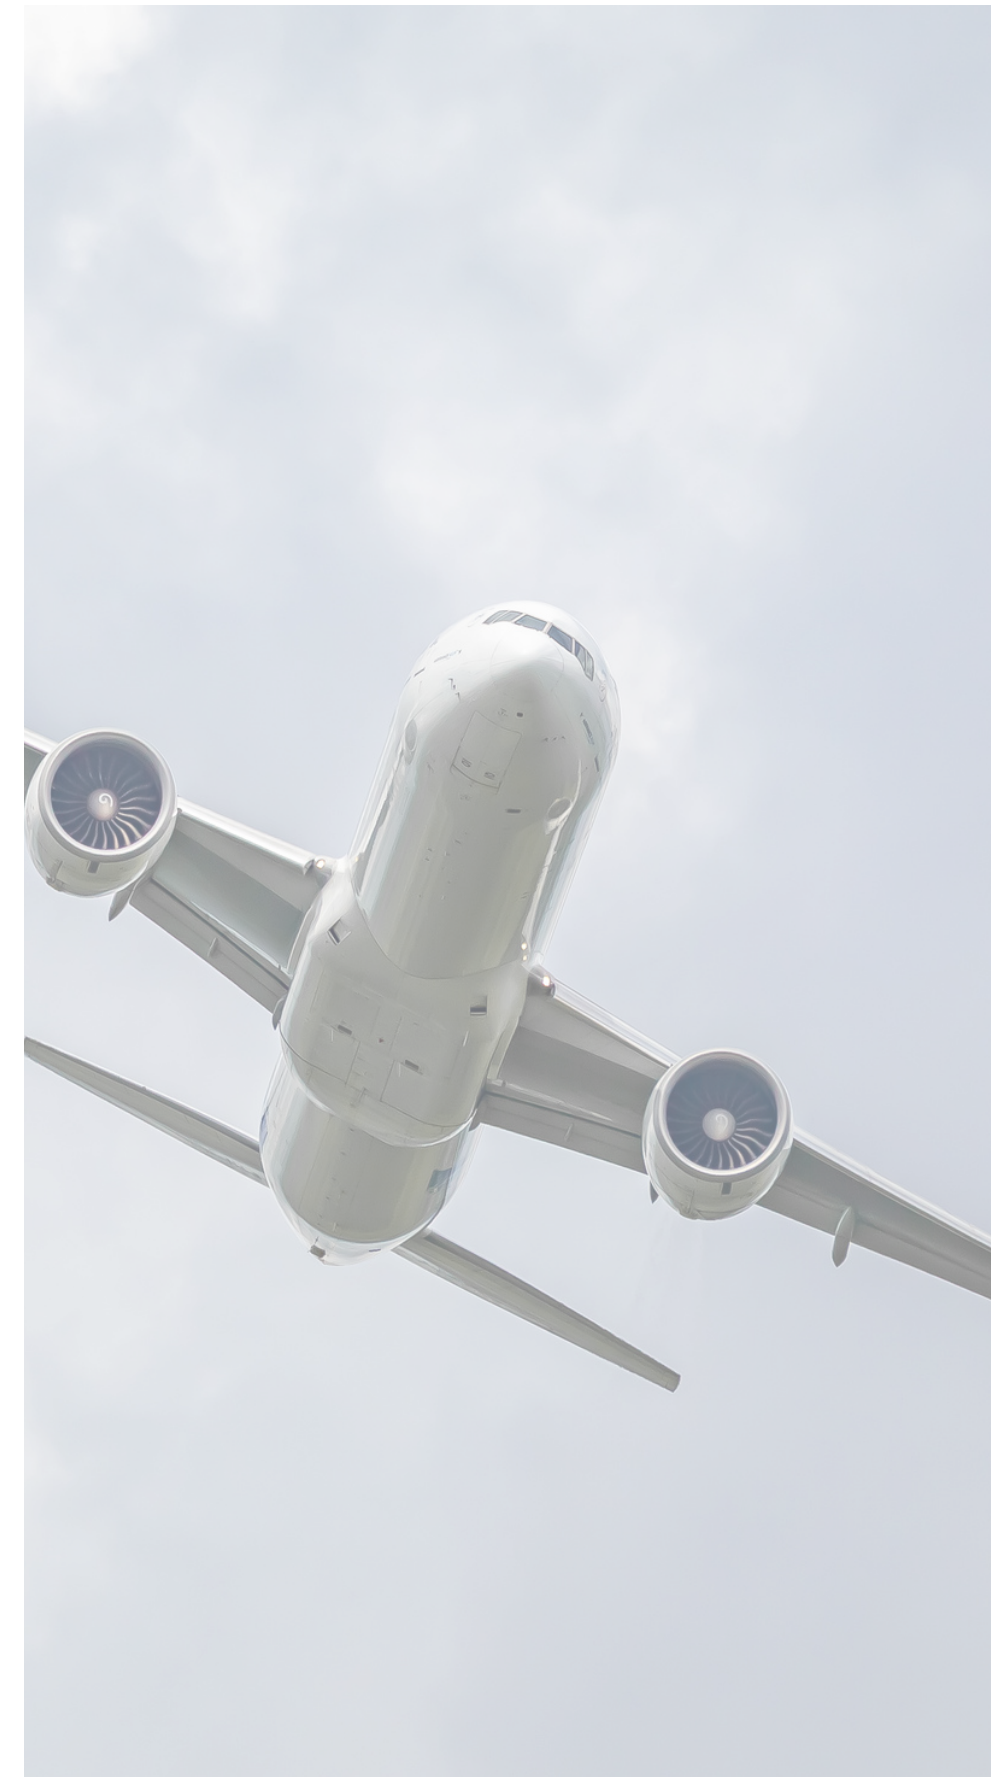

EASA Part-147 Courses

Elite offers EASA Part-147 certified training programs for B1/B2 type ratings, covering high-demand aircraft, including PPL License, also **including tailor-made training solutions upon request.**

Competitive Advantages

Integrated Learning Platforms: Elite Aero Support's digital platform and app enhance student engagement with resources like maintenance tips, 24/7 support, and course discounts, supporting both education and ongoing career growth.

Industry Partnerships: Collaborations with key institutions expand EAS's offerings, adding type ratings for popular aircraft (e.g., **Airbus A320, Boeing B737**) and access to Structured On-Job Training (SOJT), enhancing training depth and industry relevance. PPL License available.

AOG Recovery

24/7 AOG recovery and line maintenance services under EASA Part-145 approval. With maintenance stations in Europe, Asia, and Africa, **Elite delivers rapid-response solutions to minimize aircraft downtime globally.**

Competitive Advantages

24/7 AOG Support: Ability to mobilize maintenance teams on short notice globally, ensuring minimal aircraft downtime, a critical advantage for clients needing quick operational recovery.

Worldwide Coverage: Network of maintenance stations across three continents, allowing fast response times and effective local solutions tailored to client needs.

Customizable Line Stations: Elite Aero Support offers on-demand line maintenance stations, creating flexible, client-specific solutions for high-traffic or remote locations.

Tooling and Parts Supply

Elite Aero Support expands its offering to a broad range of aviation tooling and parts solutions, ensuring **cost-effective worldwide delivery tailored to individual customer requirements.**

Competitive Advantages

Cost Efficiency and Speed: Elite Aero Support leverages a streamlined logistics network, reducing lead times and maintaining competitive pricing on essential parts and tools.

Reliable Inventory Access: By focusing on high-quality tooling and parts, Elite Aero Support minimizes downtime for clients while providing peace of mind regarding part integrity.

Flexible Logistics: Global shipping capabilities allow Elite Aero Support to offer tailored logistics solutions based on client needs, ensuring quick turnaround on critical components.

Aircraft Leasing Solutions

Elite's leasing division offers flexible aircraft leasing packages that include comprehensive maintenance support and an exclusive "flying spanner" option, ensuring aircraft are always flight-ready.

Competitive Advantages

Turnkey Leasing and Maintenance: Elite Aero Support's integrated leasing model offers clients both aircraft leasing and maintenance under one roof, reducing administrative burden and improving aircraft uptime.

Flexible Contract Options: Customizable leasing terms and maintenance options allow clients to select arrangements that best suit their operational requirements.

Flying Spanner Service: On-demand maintenance personnel travel with leased aircraft, ensuring continuous support, especially for operators in remote or high-demand routes.

Academic Programs

Through affiliations with universities and colleges in China, Saudi Arabia, Qatar, Switzerland, and Cyprus, EAS offers academic pathways for students pursuing Bachelor's, Post-diploma, and Master's programs in aviation.

Competitive Advantages

Comprehensive Educational Pathways: Allows students to gain both theoretical and practical skills, positioning Elite as a complete career development partner.

Global Academic Partnerships: Collaborative programs with reputable institutions add credibility, enhancing Elite's ability to attract a broader, international student base.

Career Advancement: In conjunction with training, Elite provides Structured On-Job Training (SOJT), enabling students to fulfill EASA license requirements and gain industry-recognized experience.

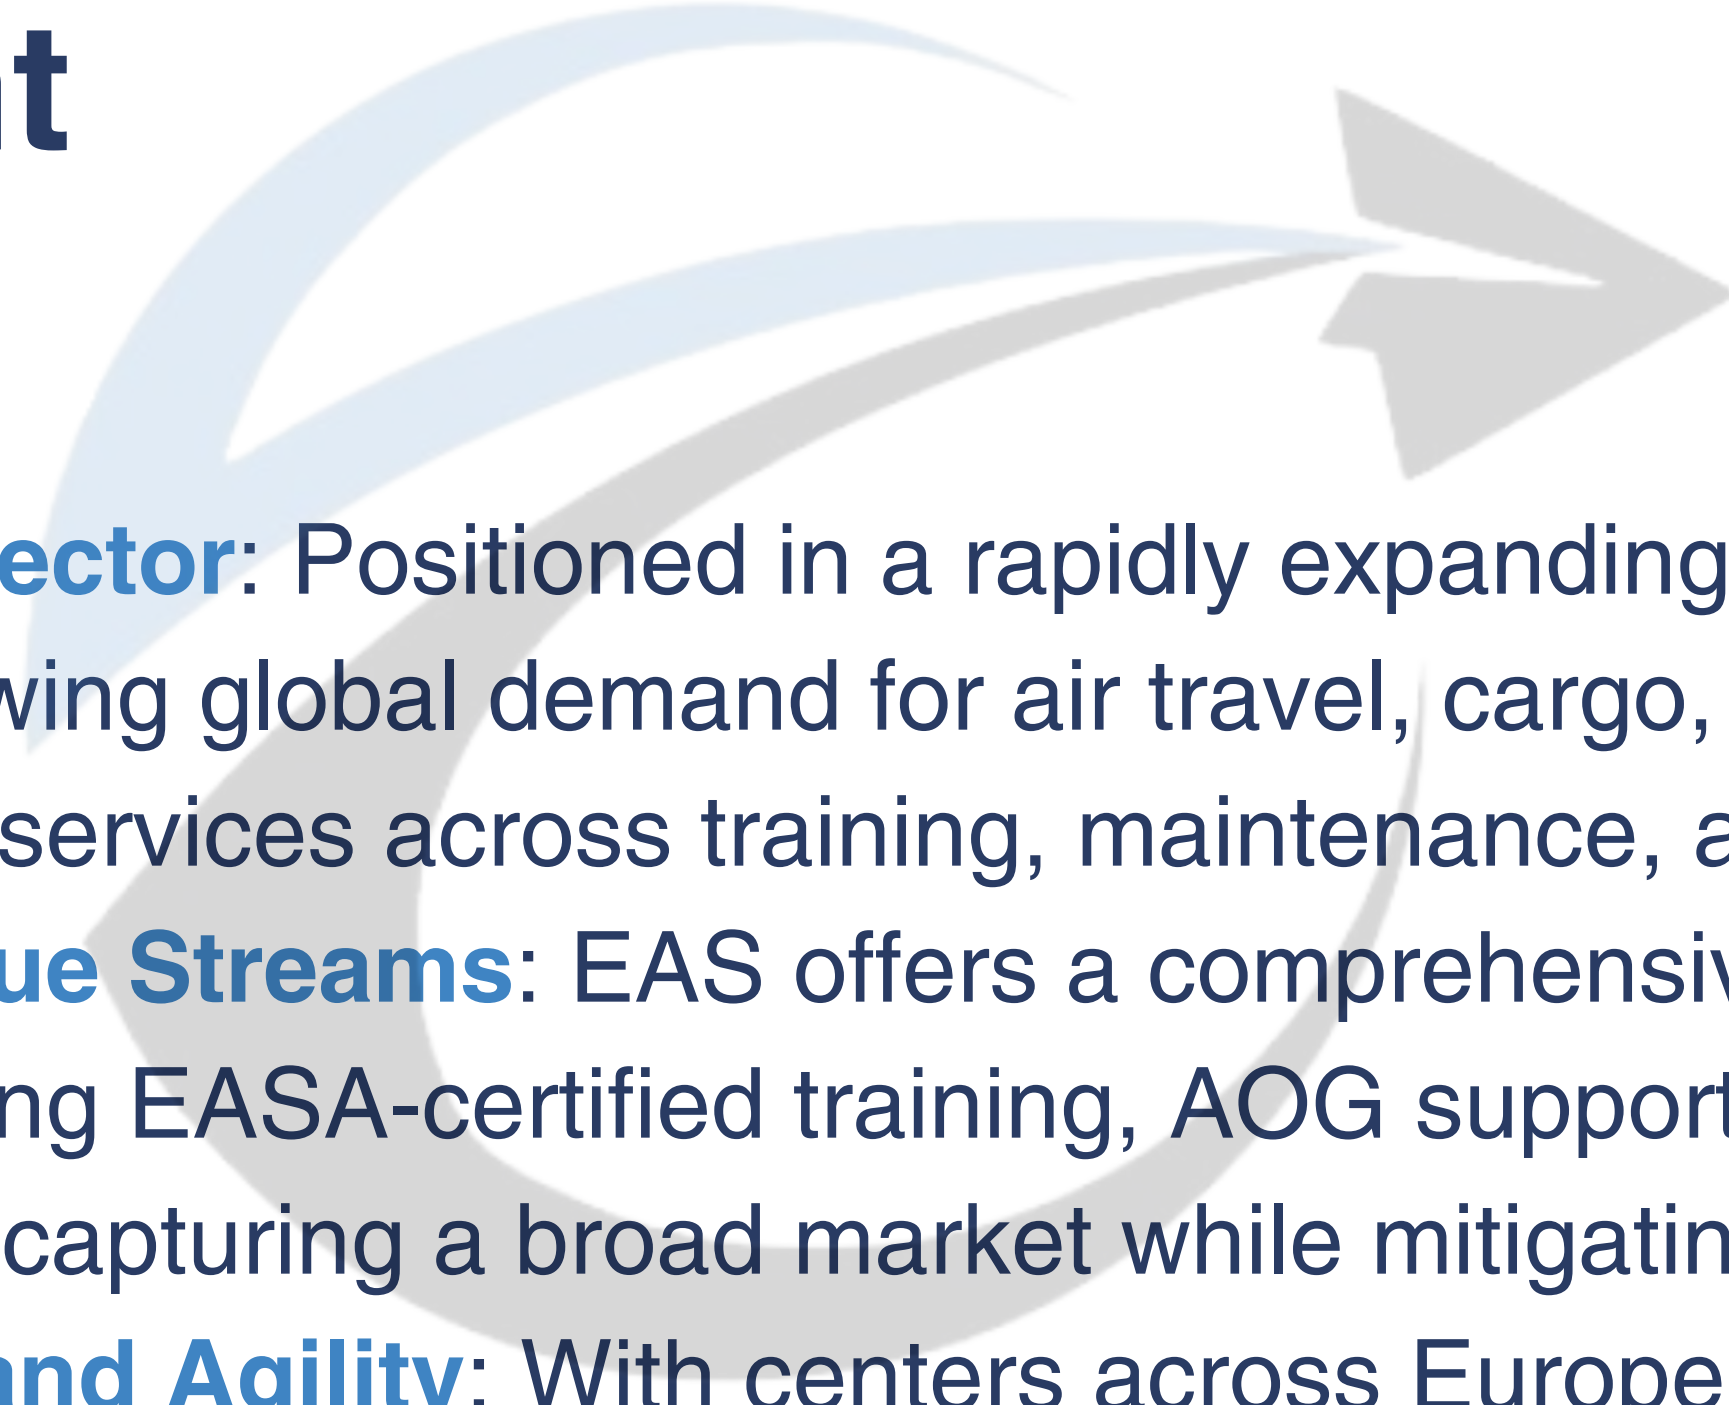

Growth Opportunities and Strategic Positioning

- **Expanding Training & Certification:** Through additional EASA-certified training programs and global locations, Elite is poised to meet the industry's skills gap and certification needs.
- **Enhanced AOG & Maintenance Capabilities:** With 24/7 support and scalable maintenance stations, Elite is prepared to meet growing global needs for efficient aircraft maintenance and AOG solutions.
- **Aircraft Leasing & Support Services:** Elite's flexible leasing options, combined with maintenance support, address rising airline demand for comprehensive leasing solutions.

Investment Rationale

- **High-Growth Sector:** Positioned in a rapidly expanding aviation industry, EAS meets growing global demand for air travel, cargo, and skilled personnel, with services across training, maintenance, and leasing.
- **Diverse Revenue Streams:** EAS offers a comprehensive service portfolio, including EASA-certified training, AOG support, parts supply, and aircraft leasing, capturing a broad market while mitigating business risk.
- **Global Reach and Agility:** With centers across Europe, Asia, the Middle East, and the Americas, EAS provides unmatched global coverage and rapid AOG response, essential for minimizing airline downtime.

Investment Rationale

- **Scalable Digital Innovation:** EAS's app and platform support scalable training and customer engagement, enabling flexible growth and loyalty in both mature and emerging markets.
- **Competitive Edge:** EAS stands out with its global accessibility, advanced learning resources, and strong affiliations, making it a preferred partner for integrated aviation services.
- **Long-Term Potential:** With strategic market expansion, EAS is positioned for sustainable growth, offering investors exposure to a flourishing aviation sector.

Scope of Services

Category	Elite Aero Support (EAS)	Lufthansa Technik	FL Technics	ST Engineering Aerospace	AFI KLM E&M
Training Programs	EASA Part 147-certified type rating and basic training; private pilot training (PPL).	None (focus on MRO services).	Limited (technical workshops only).	None (focus on MRO and design upgrades).	Internal training for employees only.
Maintenance (MRO)	Line maintenance, AOG recovery, and soon, heavy maintenance with a new hangar.	Comprehensive base and line maintenance.	Line and base maintenance with fleet upgrades.	Global MRO services, including fleet conversion.	Heavy maintenance and predictive diagnostics.
Geographic Coverage	Europe, Asia, Africa, and MENA regions.	Global hubs in Europe, Americas, Asia.	Predominantly Europe and Asia.	Predominantly Asia, Europe, and Americas.	Europe and Americas, regional expertise.
Aircraft Supported	Airbus (A320, A350), Boeing (737, 777, 787).	Broad fleet, including VIP and military.	Primarily narrow-body aircraft.	Broad fleet, including military platforms.	Primarily commercial aircraft.

Positioned for Strategic Growth

Elite Aero Support stands out as a versatile and agile player in the aviation training and maintenance market, and differentiates itself through its **comprehensive, one-stop approach**—offering EASA-certified training, pilot licensing, and expanding MRO services with the new hangar investment.

By focusing on underserved markets in the MENA, Asia, and Africa regions, Elite is strategically positioned to meet growing aviation demands with cost-effective, flexible solutions. The hangar project represents a pivotal step, **adding heavy maintenance capabilities and enhancing operational offerings to attract both airlines and aviation professionals.**

With strong growth potential, competitive pricing, and a customer-centric model, Elite is on track to establish itself as the go-to aviation partner, delivering value across the industry.
